

I am writing to urge the FCC to NOT weaken the NJ DO NOT CALL list legislation. 2.8 million NJ residents have signed up for the program. That should tell you how many people are in favor of the program that protects their right to privacy in their homes - protects them from being harrassed by sales calls. Since signing up with the program myself, the number of telemarketing calls I receive has reduced significantly. Prior to the program, I gave up answering my phone altogether. THAT'S NOT RIGHT! This program works! Finally, a piece of legislation that works and benefits the citizens it was written for. DON'T MESS WITH SUCCESS.

If I want products or services, I know how to find them. I do NOT need, nor do I appreciate businesses calling me at my home.
